I. Project Title

MindVault: Where Scattered Thoughts Find Their Place

II. Problem Statement

Many students struggle to organize their academic responsibilities because their deadlines, notes, and reminders are often scattered across notebooks, group chats, and different applications. This can lead to forgotten tasks, rushed submissions, and unnecessary stress. MindVault aims to provide students with a simple digital space where they can manage important school information, track their responsibilities, and stay organized.

III. Project Objectives

- To create a digital organizer that allows students to record and manage their school tasks, deadlines, and important notes in one place.
- To help students monitor their academic responsibilities by providing reminders and a clear view of upcoming tasks.
- To develop a simple and user-friendly system that encourages better organization and time management among students.

IV. Planned Features

Task Tracker

- Allows users to add, edit, and remove school tasks with their corresponding deadlines.

Digital Notes Storage

- Lets users save short notes, ideas, and important reminders.

Deadline Reminder

- Alerts users about upcoming tasks and unfinished responsibilities.

Workload Overview

- Shows the user's pending and completed tasks to help them understand their current workload.

Search Function

- Helps users quickly find saved notes or tasks.

V. Planned Inputs and Outputs

Inputs:

- User enters task details (task name, subject, deadline)
- User adds notes or reminders
- User marks tasks as completed

Outputs:

- Displays saved tasks and notes
- Shows upcoming deadlines
- Provides a summary of completed and unfinished tasks

VI. Logic Plan (Pseudocode)

START

Display MindVault menu

Ask user what action they want to do:

1. Add Task

2. Add Note

3. View Tasks

4. Check Progress

IF user chooses Add Task:

 Ask for task name, subject, and deadline

 Save task information

ELSE IF user chooses Add Note:

 Ask user to enter note

 Save note information

ELSE IF user chooses View Tasks:

 Display saved tasks and deadlines

ELSE IF user chooses Check Progress:

 Count completed and unfinished tasks

 Display workload summary

IF deadline is approaching:

 Show reminder message

END
